Red.Dead.Redemption.XBOX360.RF-TZ
 is the no verified bot? and the for uploading, getting a speed at 2.5 mb per second :)

tormentor8
 anyone tried this? I'm reluctant to download unrated games but just can't resist the one.. Looks like a..

Dimma80
 Anyone who download and try this can confirm that is the real deal it looks that it is but who knows??

tormentor8
 I downloaded it and it works like a charm! :)

Dimma80
 I can confirm that this game works as well.

Great upload and speeds are pretty good as well.

Later,
 Cine/Scooter

Dimma80
 Yeah its working great and what a game it is.. I wish it was more work from the company and my opinion is one of the best of the games of this year (nice speeds that's a really and thanks a lot to the uploader.) "John Weston" "Wanted dead or alive" "Theodore"

Dimma80
 Hey Dimma80.

When I download both the .dvd and .iso.

Do I only use the .dvd file onto the the disc using img burn?

Dimma80
 @Dimma80 u are in the right place dude first of all u need imgburn program to burn the image file+DVD. U need Verbatim DL-R 8X or 4X and u are ready to do it. U must have the image file+DVD and the iso file (the big one 7.3GB) both in a folder side by side and use imgburn. imgburn takes the image file+DVD and do the trick. U can see what to load in imgburn. Click write image in DVD browser for a file and select the image file+DVD the small one in bytes I mean write speed at 2" and finally push the write button. Finally when the burn starts to a point the DVD Rom will open and close and then the 2 part will continue. So take that in mind Cheers

Zaxx
 I got a problem. Since my xbox is banned from xbox live I got worried I should be able to download and play anymore games, but my old games seem to work so I thought this would do too. After I downloaded it and burned it with imgburn (The DVD file), but it doesnt seem to work. Is the because im banned from 78% or might I done something wrong, someone said something about clone d'ed, dont think he done that

Dimma80
 @Zaxx what exactly is the problem. What it says in your TV screen. I mean what message do u get. To be honest I dont have live so my 360 so I don't know for sure about the banning thing but it might be an another problem?

Zaxx
 @Dimma80 I don't get any message at all. Its just like I put in a completely empty disc. The xbox 360 more just loops around. Like on playing a normal DVD video.

Zaxx
 I'm starting to think he burned it wrong. This is how I did it. I burned the iso file with imgburn, but it told me to burn the DVD file instead, so I did. I waited for the whole burning process. And that pretty much it. Can someone tell me exactly how to burn the with imgburn? BTW I use DVD+R DL too.

Dimma80
 @Zaxx did u burn it at 2x speed? And u must use Verbatim DL-R (the best choice). When the burning stuff finish did u get a message (success) so u know that u did a good burning job. To u have the iso file and image file+DVD both together in a folder. Do u have the latest Dashboard update. And look my previous post about burning.

Zaxx
 I did it with MAX speed. Whats the difference? @Dimma80 I have done like you told me. Eto Dashboard? How do I update stuff on my xbox without xbox live?

philly
 @Zaxx thats the problem, you're burning at max speed. Always burn at slow speed, people say 2x, but I usually burn at 2.4x and my games are fine. Let us know how you get on. I too have a banned console but other games play just fine. hope that helps.

Dimma80
 @Zaxx go there for the official Dashboard updates for the new games and more <http://support.xbox.com/support/en/usa/19.aspx?d=93346&id=3033&category=hardware>

Zaxx
 I just burned it at 2x speed. Same problem. So why do I have to burn it on such a slow speed?

philly
 burn it 2.4x or 4x speed you don't need the verbatim disks. I mean it work fine too, and many others

Zaxx
 Just updated my Dashboard too. still doesnt work.

Dimma80
 Thanks for the tip dimma, quick question. What verbatim do I use? The 2.4x Verbatim disks or the 8x verbatim disks? I do know that you have to burn at 2x or 2.4x but I am confused as to which verbatim disk I have to buy.

tormentor8
 playing great
 I burned it to a memorex 8x
 works great
 is the rockstar code a 2 time thing or can someone share theirs

Zaxx
 Whats activate iso disc?

tormentor8
 @Zaxx - Check out this link for more info on the Active ISO boot disk - <http://www.activator.com/forums/3172040/7-how-to-activate-iso>

In short though you do not need it as long as your running Xtrame 1.6+

As long as the .dvd formatted to the .iso file with imgburn the game should work just fine.

Running on the latest dashboard on a banned system now.

Has yet to a great game.
 Might as well just buy it ya'll..

Later,
 Cine/Scooter

tormentor8
 reeeeeed you leechers... verified by abq? and is the full version and go to play online?

Dimma80
 @Dimma80 I always use Verbatim DL+R 8x speed and I never had problems.
